

what if... pigs could fly?

We are looking for innovative and creatively drawn sketches [limited digital outcomes] and written notes that explain your design thinking.

Your completed design response needs to be submitted as: **4 scanned, A4 pages** that address each design focus [right] through user-centred ideas (which in this case is a new product/system that uses sustainable engineering to improve its use and comfort).

DESIGN STIMULUS

Your overall design should focus on:

use of unique and creative forms

user comfort

consideration of waste and resource use

use of sustainable processes and materials

including an innovative design feature or process

consider future design needs

Year 8 art+design excellence program
DESIGN CHALLENGE (2027 intake)

Design a **product** or **system** that enables a pig to fly!

Email your completed design challenge sketches and application form to:
